All categories are fully detailed under **CHARACTER CLASSES**, *Thieves*. The racial adjustments are applied to the base chances of success for each named category.

N.B. The above tables do not take into account dexterity below 13 or above 15. Neither do they account for thieves wearing other than leather armor. For complete information regarding adjustments for these circumstances refer to **CHARACTER ABILITIES**, *Dexterity* and **CHARACTER CLASSES**, *Thieves* in the **AD&D PLAYER'S HANDBOOK**.

WALL CLIMBING TABLE, FEET PER ROUND OF CLIMBING

Wall Surface is Best Described as —	Condition of Surface*		
	Non-slippery	Slightly Slippery	Slippery
Very smooth – few cracks	6'	3'	0'
Smooth but cracked – somewhat rough	12'	6'	3'
Fairly rough & some cracks – very rough	18'	9'	6'
Rough & with many projections and ledges	24'	12'	9'

* SLIGHTLY SLIPPERY surfaces DOUBLE chances of slipping and falling. SLIPPERY surfaces make chances of slipping and falling TEN TIMES more likely. Thus, a slippery surface cannot be attempted successfully by any thief under 6th level, and even a 10th level thief has a 10% chance per round of slipping and falling.

Be certain to check each round of vertical or horizontal movement for chance of slipping and falling. Treat surfaces inclined inwards as a worse surface and surfaces inclined away as either a better surface condition or rougher texture. Most dungeon walls will fall into the fairly rough to rough category. Some will be non-slippery, but most will be slightly slippery due to dampness and slime growth.

ENCOUNTER REACTIONS

Any intelligent creature which can be conversed with will react in some way to the character that is speaking. Reaction is determined by rolling percentile dice, adjusting the score for charisma and applicable loyalty adjustment as if the creature were a henchman of the character speaking, and the modified score of the percentile dice is compared to the table below:

Adjusted Die Score	Reaction
01 (or less)-05	Violently hostile, immediate attack*
06-25	Hostile, immediate action*
20-45	Uncertain but 55% prone toward negative
40-55	Neutral, uninterested, uncertain
56-75	Uncertain but 55% prone toward positive
76-95	Friendly, immediate action
96-00 (or greater)	Enthusiastically friendly, immediate acceptance

* Or morale check if appropriate.

MORALE

Morale Checks Made When

Faced by obviously superior force*	check each round
25% of party** eliminated or slain	check at +5%
Leader unconscious	check at +10%
50%+ of party** eliminated or slain	check at +15%
Leader slain or deserts	check at +30%

* Such as in melee when one force is hitting twice as often as the other.

** Or individual taking this much personal wound damage.

Other Morale Check Modifiers

	Adjustment
Each enemy deserting	-5%
Each enemy slain	-10%
Inflicting casualties without receiving any	-20%
Each friend killed	+10%
Taking casualties without receiving any	+10%
Each friend deserting	+15%
Outnumbered & outclassed by 3 or more to 1	+20%

Player character's henchmen or associated creatures have a base morale equal to their loyalty score (50% +/- charisma loyalty adjustment). Intelligent monsters have a base morale of 50%, + 5%/hit die above 1, + 1%/hit point above any hit dice.

To check morale, take the base morale (loyalty) score and cast percentile dice. Adjust the score for penalties and bonuses, and if the adjusted score is equal to or less than the loyalty score, morale is good. If the number exceeds the base morale (loyalty) score, the creature will react according to the morale failure table below (using the difference between the maximum score needed to retain morale and the number actually rolled):

Morale Failure by Action Taken

1% to 15%	fall back, fighting
16% to 30%	disengage-retreat
31% to 50%	flee in panic
51% or greater	surrender

DETECTION OF INVISIBILITY TABLE

Creatures possessing 7 levels/hit dice or more may have the ability to detect invisible creatures. The table below gives the probability of detection:

Note: You may give unintelligent creatures with keen hearing or sense of smell the equivalent of intelligence to reflect detection of invisible creatures.

Check each round the creature is exposed to invisibility. Once detected, the invisible creature will be kept track of thereafter, as the detector will be able to note the cause. Any attacks incur the -4 penalty of attacking an invisible opponent, of course, and the invisible creature likewise is entitled to +4 on saving throws.

RECOVERY OF SPELLS

Once rested, magic-users must memorize their spells and clerics must pray and meditate. Allow 15 minutes of game time for memorization or prayer for each spell level. Such activity requires a mind rested by a good sleep and nourished by the body. Required rest for memorizing or praying for spells is as follows:

SPELL LEVEL	1-2	3-4	5-6	7-8	9
Rest time	4 hours	6 hours	8 hours	10 hours	12 hours

RANGES FOR COMMON HEALING SPELLS AND MAGIC ITEMS

Source of Healing	Amount of h.p. Healed
Cure light wounds	1-8 (1d8)
Cure serious wounds	3-17 (2d8 + 1)
Cure critical wounds	6-27 (3d8 + 3)
Heal	all but 1-4 (1d4)
Potion of healing	4-10 (2d4 + 2)
Potion of extra healing	6-27 (3d8 + 3)
Staff of curing	6-21 (3d6 + 3)
Keoghtom's ointment	9-12 (1d8+4)

- ** Evil creatures from lower planes such as minor demons, lesser devils, night hags, from 1-2 in number, (As a rule of thumb, any creature with armor class of -5 or better, 11 or more hit dice, or 66% or greater magic resistance will be unaffected.)
- a A paladin of 1st or 2nd level can be turned by an evil cleric.
- b A paladin of 3rd or 4th level can be turned by an evil cleric.

- d A paladin of 7th or 8th level can be turned by an evil cleric.

GRENADE-LIKE MISSILES: CONTAINERS OF ACID, HOLY/UNHOLY WATER, OIL, POISON AND BOULDERS HURLED BY SUCH THINGS AS GIANTS AND SIEGE MACHINES.

Hurling various containers of liquid is a common tactic in dungeon adventures. For game purposes it is necessary to make certain assumptions regarding all such missiles.

Size:

Acid —	½ pint (8 oz.)
Holy/Unholy Water —	¼ pint (4 oz.)
Oil —	1 pint (16oz.)
Poison —	¼ pint (4 oz.)

Effect:

Liquid Contents	Area of Effect	Damage from a Splash	Direct Hit
—acid	1' diameter	1 h.p.	2-8 h.p.
—holy/unholy water	1' diameter	2 h.p.	2-7 h.p.
—oil, alight	3' diameter	1-3 h.p.*	2-12 h.p. + 1-6 h.p.**
—poison	1' diameter	special	special

- * Flaming oil splashed on a creature will burn for 1-3 segments, causing 1 hit point of damage per segment.
- ** Direct hit with flaming oil causes 2-12 hit points of damage the first round, and 1-6 additional hit points of damage the second round, but then burns out.

Range: The range of all such container missiles is 3", Beyond 1" is medium, and beyond 2" is long (-2 and -5 "to hit" respectively).

Hits: When the die roll indicates the missile has hit, then it is necessary to roll again to see if the container shatters or not — use the **Blow, Crushing** column on the **ITEM SAVING THROW MATRIX** — unless special procedures were taken to weaken the container, i.e. the container was specially scored, it is particularly fragile, etc. Damage occurs only if the container breaks, except with regard to oil which must be alight (flaming) to cause damage. Poison *special* is dependent upon whether or not the poison is a contact poison or if the container was hurled into the mouth of the target creature. In the latter case, breakage is not necessary if the container was unstoppered; if stoppered check saving throw for breakage using the **Blow, Normal** column of the **ITEM SAVING THROW MATRIX**. If oil has been specially prepared by insertion of a rag into the opening of the container (or wrapped around the neck of the container) and set afire prior to hurling, it will burst into flame when the container breaks upon target impact; otherwise, a torch or other means of causing combustion must be brought into contact with the oil.

- e A paladin of 9th or 10th level can be turned by an evil cleric.
- f A paladin of 11th or higher level can be turned by an evil cleric.

Procedure: A d20 is rolled and, if the *number* shown is matched or exceeded by the die roll, the undead are turned. From 1-12 (or 7-12 or 1-2) undead (or evil creatures from lower planes) are affected:

1. **Evil clerics** cause the creatures to take neutral or friendly attitude according to a reaction dice score. Neutral undead will ignore the cleric and his or her party; friendly ones will follow the cleric and join the adventure.
2. **Good clerics** cause the creature to move directly away from his or her person, and stay as far away as possible for not less than 3 nor more than 12 rounds, moving at full speed for the duration if at all possible. The turned undead will be able to come back again, but they are subject to further turning by the cleric.

Failure to score the number shown, or greater, means the turning was unsuccessful. No further attempt by the cleric can be made with respect to the particular undead, and they may proceed to attack or otherwise operate unconstrained.

- T:** This symbol indicates automatic turning — whether to influence by an evil cleric or actual driving away by a good cleric.
- D:** This symbol indicates the cleric has automatically brought the undead into friendly status (evil cleric) or destroyed or damned them (good cleric).
- :** No effect upon the undead is possible where a dash is shown.

Splash Hits: All creatures within three feet of the impact and breaking point of the container missile must save versus poison or be splashed with the contents of the shattered container.

Boulders are considered, for game purposes, to be 1' in diameter for giants, 2' in diameter for siege engines. Range and damage of siege machines is given in the appropriate section. (See **MONSTER MANUAL**, *Giant* for giants' abilities.)

Misses: If the "to hit" die roll indicates a miss, roll 1d6 and 1d8. The d6 indicates the *distance in feet* the missile was off target. (If the target was large, simply compute the distance from the appropriate portion of the target, i.e. the character aims at a section of the floor which is 1' square, and miss distance is measured from the appropriate edge as explained below.) The d8 indicates the *direction* in which the distance in feet of the miss is measured:

1 = long right	5 = short left
2 = right	6 = left
3 = short right	7 = long left
4 = short (before)	8 = long (over)

At short range you may optionally use d4 to determine distance off target, but then use d8 for long range distance determination. If the missile is hurled at a plane such as a wall, read long as high, short as low, measuring up the wall and then along the ceiling or down and then along the floor.

Lighting Oil: If a torch is used to attempt to light spilled oil, use above procedures for misses, as it still could land in the puddle of oil or oil covered area. A lantern should be handled similarly, but also allow it a 2' diameter flaming oil area.

Crossing Flaming Oil: Leaping over a puddle of flaming oil will cause no damage, unless the creature so doing is highly inflammable. Creatures with garments of cloth must save versus **Fire, Normal** on the **ITEM SAVING THROW MATRIX** or have their garments catch fire. Walking through or standing in flaming oil will cause the creature to take 1-6 hit points of damage per melee round.

Holy/Unholy Water: All forms of undead, as well as creatures from the lower planes (demons, devils, night hags, night mares, etc.) are affected by **HOLY WATER**. Paladins, lammasu, shedu, ki-rin, and similar creatures of good (or from the upper planes) are affected by **UNHOLY WATER**. The liquid causes the affected creature to suffer a burning as if struck by acid. Undead in non-material form cannot be harmed by holy water, i.e. until a ghost takes on material form, it is unaffected, and a vampire in gaseous form cannot be harmed by holy water.

OPPONENT ARMOR CLASS DESCRIPTION (IF ARMOR IS WORN)

Armor Class	Type of Armor
2	Plate mail + shield
3	Banded mail + shield, splint mail + shield, or plate mail
4	Chain mail + shield, banded mail, splint mail
5	Scale mail + shield, or chain mail
6	Ring mail + shield, studded leather armor + shield, or scale mail
7	Leather armor + shield, padded armor + shield, ring mail, or studded leather armor
8	Leather armor or padded armor
9	Shield only
10	None

Armor class below 10 is not possible. Armor class above 2 is easily possible due to magical bonuses and dexterity bonuses. To determine a "to hit" number not on the charts, project upwards by 1's (5% increments), repeating 20 six times before continuing with 21 (cf. MATRIX I.A.).

The percentage shown is that for success under near optimum conditions. You may adjust slightly upwards for perfect conditions (absolute trust, asleep and unguarded, very drunk and unguarded, etc.). Similarly, you must deduct points if the intended victim is wary, takes precautions, and/or is guarded. If the assassination is being attempted by or in behalf of a player character a complete plan of how the deed is to be done should be prepared by the player involved, and the precautions, if any, of the target character should be compared against the plan. Weapon damage always occurs and may kill the victim even though "assassination" failed.

* Or attacks on helpless opponents by any character class.

MISSILE FIRE AND CONCEALMENT ADJUSTMENTS

Adjust the armor class of the target creature as follows if cover (hard substances which protect) or concealment (soft substances which screen) exists:

Target has about —	Armor Class Bonus
25% cover	+2
50% cover	+4
75% cover	+7
90% cover	+10
25% concealment	+1
50% concealment	+2
75% concealment	+3
90% concealment	+4

Hard cover will increase chances for saving throws as noted. Cover equal to 90% (or better) will also give the target creatures the benefit of no damage whatsoever if the appropriate saving throw is successful.

SPECIAL "TO HIT" BONUSES

The following general rules will be of assistance when you must adjudicate melee combat or missile fire:

Opponent encumbered, held by one leg, off balance, etc.	+2
Opponent stunned, held by both legs, slowed, partially bound, etc.	+4
Opponent magically asleep, held, paralyzed, or totally immobile	Automatic

Magically Sleeping or Held Opponents: If a general melee is in progress, and the attacker is subject to enemy actions, then these opponents are automatically struck by any attacks or attack routines to which they would normally be subject, at twice the normal rate and the maximum damage possible according to the weapon type or attack mode. Otherwise, such opponents may be automatically slain, or bound as appropriate to materials at hand and size, at a rate of one per round. Note that this does not include normally sleeping opponents (see **ASSASSINS' TABLE FOR ASSASSINATIONS** above).

SPECIAL ARMOR CLASS CONSIDERATIONS

The direction of an attack alters certain armor class considerations for a defender. These are as follows:

Direction of Attack	"to hit"	Shield	Dexterity	Note:
Flank attack	normal	no	no	A buckler or small shield will only provide protection against one frontal attacker per melee round, a medium shield, 2 attackers, and a large shield, 3 attackers.
Rear attack	+2	no	no

* Excluding polymorph wand attacks.

** Excluding those which cause petrification or polymorph.

*** Excluding those for which another saving throw type is specified, such as death, petrification, polymorph, etc.

- a Includes Druids.
- b Includes Paladins, Rangers, and 0 level types.
- c Includes Illusionists.
- d Includes Assassins and Monks.

N.B.: A roll of 1 is *always* failure, regardless of magical protections, spells, or any other reasons which indicate to the contrary.

Multi-class characters, characters with two classes, and bards check the matrix for each class possessed, and use the *most favorable* result for the type of attack being defended against.

SAVING THROW MATRIX FOR MONSTERS

- A. All monsters use the matrix for characters.
- B. Hit dice equate to Experience Level, with every one to four plusses in hit points moving the creature upwards by one hit die, so that **1 + 1 to 1 + 4 becomes 2, 1 + 5 to 1 + 8 becomes 3, etc.** (Exception: See D. below.)
- C. **Most monsters save as fighters, except:**
 - 1. Those with abilities of other character classes gain the benefit of the most favorable saving throw score, i.e. be it cleric or magic-user or thief.
 - 2. Those with no real offensive fighting capabilities save according to their area of ability — cleric, magic-user, thief, etc.
- D. **Non-intelligent creatures save at an Experience Level equal to one-half their hit dice, rounded upwards,** except with regard to **Poison or Death Magic**.

* Potions, magical oils, poisons, acids while container remains intact.

** Includes pearls of any sort.

*** Silvered glass. Treat silver mirror as "Metal, soft" and steel mirror as "Metal hard."

a If exposed to extreme cold then struck against a very hard surface with force, saving throw is -10 on die!

Magical Items: Gain +2 on all rolls plus +1 for each plus they have above +1, i.e., +1 = +2 on saving throw, +2 = +3 on saving throw. Furthermore, the magic item gains +5 on saving throws against attack forms in it's own mode, i.e. blow vs. shield, *fireball* vs. *ring of fire resistance* or *fireball wand*.

Non-magical Items: Those items which do not exactly conform to item descriptions above can be interpolated. It is assumed that the item in question is actually exposed to the form of attack, i.e. the blow falls on the item, the fall is such as to not cushion the item, the fire actually contacts the item, etc. As with magical items, non-magical items gain +5 versus attacks in their own mode.

1. **Acid:** This assumes a considerable volume of strong acid (black dragon or giant slug spittle) or immersion for a period which would affect the item.
2. **Blow, Crushing:** This assumes that the item is struck by a weighty falling object or a blow from on ogre's or giant's weapon, for example. Another example would be a (ceramic) flask of oil or a (crystal or glass) vial of holy water hurled against a hard surface) or dropped from a height. A piece of cloth can be ripped or torn by a crushing blow.
3. **Blow, Normal:** This assumes on attack by a normal-strength opponent or only fairly heavy object which strikes the object. This also applies to a (ceramic) flask of oil or a (crystal or glass) vial of holy water hurled against a tough, but slightly yielding, surface.
4. **Disintegration:** This is the magical effect.
5. **Fall:** This assumes the item falls about 5' and comes into contact with a hard (stone-like) surface. A softer surface (wood-like) gives a +1 on the saving throw, and a fleshy-soft surface gives +5. For each 5' over the first 5' the item falls, subtract -1 from the die roll to save.

6. **Fireball:** This is the magical *fireball*, *meteor swarm*, (red) dragon breath, etc.
7. **Fire, Magical:** This is the magical *wall of fire*, *fire storm*, *flame strike*, etc.
8. **Fire, Normal:** This assumes a hot fire such as produced by a blazing wood fire, flaming oil, and the like. The item in question would have to be exposed to the fire for an amount of time sufficient to have an. effect, i.e. paper or parchment for but 1 melee round, cloth for 2, bone or ivory for 3, etc.
9. **Frost, Magical:** This is the magical frost or cold such as dragon breathes or spells such as *cone of cold* or *ice storm*.
10. **Lightning Bolt:** This is a magical attack from lightning called from the sky, blue dragon breath, etc.
11. **Electrical Discharge/Current:** The "shock" of an electric eel, magical items, traps, etc.

- ^a Weapon does twice the damage indicated by the die (dice) to larger than man-sized creatures (L) when it is set (firmly grounded) to receive a charging opponent.
- ^b Weapon does twice the damage indicated by the die (dice) to creatures of any size when it is employed by an attacker riding a charging mount.
- ^c Weapon is capable of dismounting a rider on a successful "to hit" roll.

- ^d Weapon is capable of disarming an opponent on a score required to hit AC 8.
- ^e Weapon does twice the damage indicated by the die (dice) to any opponent when set (firmly grounded) to receive their charge.
- ^f Treat as a longsword if used one-handed for damage and armor class adjustment but not space required nor speed factor, those remain as a bastard sword.

Rate of fire is based on the turn (for table-top miniatures) or the melee round.

Ranges are: S = Short, M = Medium, L = Long. Adjust by -2 at all **medium** ranges, -5 at all **long** ranges. **Note:** Ranges are in tens of feet indoors and in tens of yards outdoors.

Armor Class Adjustment is based on the weapon or missile being discharged at short range. Adjust by -1 at all **medium** ranges, -2 at all **long** ranges.
